

## Campaign Promise for Education in Saskatchewan

The Progressive Conservative Party of Saskatchewan are committed to ensuring all residents are safe from contaminants in their drinking water and home insulation in the form of asbestos. Exposure to asbestos has been linked to various health ailments and it is the duty of government to ensure the best possible living environment for its citizens.

We will:

1. Replace asbestos laden lead pipes
2. remove asbestos in public commercial buildings
3. replace asbestos insulation in public residential buildings
4. Pass a bill incentivizing private owners to do the same for point 2. And 3.

Your government owes it to you to do better. The Progressive Conservative Party of Saskatchewan WILL do better.
