

## Campaign Promise for the Ministry for Seniors, Persons with Disabilities and Veterans

The Progressive Conservative Party of Saskatchewan are committed to ensuring all people in Saskatchewan are cared for, the SK Party has not been doing this. This is why a Progressive Conservative Party of Saskatchewan will develop a new ministry for seniors, persons with disabilities and veterans. "We need to do a better job and can do better in taking care of people, especially the most vulnerable and those who have built, shape and defended for this country and province."

This Ministry will be made up of

1. 2 people within senior's advocacy groups
2. 2 people from persons with disabilities
3. 2 Veterans
4. 1 member of government which acts as a chair

This ministry will be responsible for the advocacy of the individuals which fall within these groups. Set up policy which will aid these groups

Have resources available for people to help navigate through job pools, education programs, health care and emergency funding.

This is essential to provide the best care for individuals, keeping seniors home longer with adequate care, providing access to mental health care for those who need without an extended wait list, aid with navigating paper work so people in need can get funding for prosthetics, mobility aids, service dogs and anything else that is needed to live a quality life.
